**2010 edition of Medical and Pharmaceutical
spell check software announced by Spellex.**

TAMPA, FL – Spellex, the industry leader in spell checking solutions, announces a new version of their popular medical and pharmaceutical spelling software for Microsoft and other programs. The 2010 release includes thousands of new medical and pharmaceutical words.

Benefits: The new medical and pharmaceutical spelling dictionaries offer an excellent alternative to paper medical dictionaries, pharmaceutical word books, and medical spellers. By adding *Spellex Medical 2010* and *Spellex Pharmaceutical 2010* to the common English language lexicon, the spell checkers will verify correctly spelled medical and pharmaceutical words and provide correct spelling choices for incorrectly spelled terms. The spell checkers also allow users to verify unsure spelling of medical and pharmaceutical words by phonetic or typographical search as they type. The user saves time and increases their accuracy. Both the standard English language dictionary and the Spellex medical and pharmaceutical dictionaries are checked simultaneously.

Medical: *Spellex Medical 2010* adds more than 300,000 medical words from over 70 medical specialties to the basic speller. Spellex checks for accurate spelling of medical and surgical terms, procedures, diseases, drug names, acronyms, eponyms, medical devices, abbreviations, Greek terms and diacritical markings such as Behçet's syndrome and Legg-Calvé-Waldenström disease. Medical dictionary users can subscribe to the *Spell-X-Plus™* software subscription service for quarterly software updates of new medical terms, new medications, and more.

Pharmaceutical: *Spellex Pharmaceutical 2010* correctly spells thousands of OTC drugs and prescription pharmaceuticals, generic and trade name drugs, Latin and Greek terms, orphan drugs, pharmaceutical manufacturers, drug distributors, and more. The pharmaceutical speller includes comprehensive pharmacologic - therapeutic classifications covering anaesthetics, anti-infective agents, antineoplastic agents, cardiovascular drugs, central nervous system agents, dental agents, diagnostic agents, enzymes, gastrointestinal drugs, oxytocics, serums and vaccines, vitamins, and more!

Prices for the medical and pharmaceutical dictionaries start at \$69.95 USD for single users. Larger licenses and enterprise licenses are available. Dictionaries are compatible with Microsoft and many other platforms and support most multi-user environments.

To order the medical and pharmaceutical dictionary software or to request product information or a free evaluation copy, visit the Spellex Web site at www.spellex.com or contact Spellex Customer Service at 1-800-442-9673.
