

# The Perfect Defense against legal and medical spelling errors.

**O**ne typographical error... that's all it takes to turn a molehill into a mountain... and a client into a liability risk. With Spellex, you're only a split second away from turning your favorite program into a legal or medical word expert.

## The Most Comprehensive Spelling Dictionaries Anywhere!

If you've ever tried to spell check legal or medical words like *coexecutor*, *quaestor*, *fiducia* or *lymphopoiesis*... or tens of thousands of other words, you know that your spell checker doesn't include thousands of terms needed by professionals who deal with legal or medical issues.

With Spellex, you can practically eliminate the annoying 'Not Found' messages while running your spell checker. No more wasting time flipping page after page searching for the correct spelling in a dictionary. No more stopping to add words to your speller. And no more embarrassing (*and potentially libelous*) legal or medical spelling errors!

## Assists with Unsure Spelling!

Not sure how to spell a word? Simply type the word the way you think it might be spelled and get a list of all similar sounding or spelled choices. WordPerfect users can type the first few letters of a word to view a list of spelling choices that start with the letters typed. Replace misspelled words with a single keystroke or mouse click too!

## Simple To Use...and Install!

Spellex works *inside* your Microsoft®, WordPerfect®, or Lotus® spell checker... exactly like you use it now. That means there's nothing new to learn and no training manuals to read! To install, just type "Setup" and Spellex does the rest.

## Legal Spelling Power!

*Spellex Legal* automatically checks thousands of terms from all areas of law including - Administrative Law, Admiralty, Antitrust, Civil, Commercial, Computer, Constitutional, Criminal, Estate, Family, Government, Healthcare, Immigration, Intellectual Property, Labor & Employment, Litigation, Malpractice, Media, Patent, Personal Injury, Products Liability, Real Estate, Securities, Technology, Workers' Compensation, and more! This comprehensive speller even includes thousands of terms not found in *Black's*®, *Ballantine's*®, or *Bouvier's*® dictionaries.

*Spellex Legal* includes hundreds of abbreviations used in citations, including case reports and other legal publications, and by government agencies. *Spellex Legal* also includes acronyms covering professional degrees and organizations plus shortened word forms important to the legal profession.

## Medical Spelling Power!

Whether you're working in the fields of Personal Injury, Workers' Compensation, Medical Malpractice, or Health Law, *Spellex Medical* will correctly spell medical procedures, surgical terms, diseases, medical slang, research terms, drug names, word forms, medical devices, eponyms, acronyms, abbreviations, and more! Greek letters and diacritical markings are included too!

Covering more than **60 medical specialties** from Anesthesiology to Virology, *Spellex Medical* includes thousands of critically important terms from medical, surgical, chemistry, and laboratory terminology.

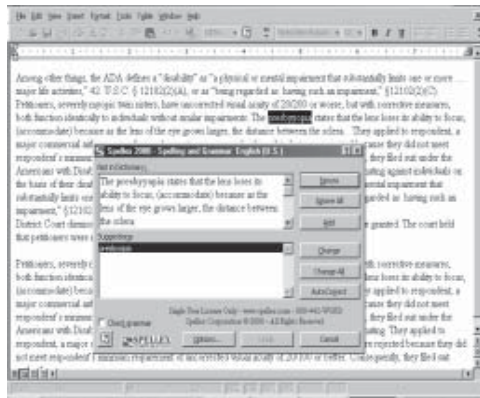

## Keep up to date with SPELL-X-PLUS™

New medical terms are introduced DAILY-new operative procedures, new instruments, new medications, new FDA approvals, new techniques, new tests...the list goes on and on! Many of these terms will not be found in your medical or law dictionaries for years -- if at all!

With the SPELL-X-PLUS quarterly software updates, you can easily keep your program up to date with the newest words in medicine!

## Works on your Computer!

Spellex works with your PC or Mac. All you need is a compatible program like Microsoft Word or WordPerfect. Spellex requires no additional hardware and less than 2MB disk space. Multi-user versions are available too!
